

This Valentine's day hear all the sounds you love!
Hearing Problems? Take a Look Inside Your Ear.

The Video Otoscope is a miniaturized camera that displays an exceptionally clear picture of your ear canal on a computer monitor.

So you can see for yourself if there is a wax problem.

It may be wax!

If you wear hearing aids, the Video Otoscope can help determine the cause of fitting and other problems, so come in and let us demonstrate this state-of-the-art technology. And if you take advantage of this special offer, there is **NO CHARGE** for this service.
