

The “*HEARING* Bone’s” *CONNECTED* to the *What?!*!

- Earning Power
- Increased Risk of Falling
- Increased Hospitalizations
- Depression
- Heart Disease
- Chronic Kidney Disease
- Diabetes
- Alzheimer’s Disease, Cognitive Decline and Dementia
- Active, Healthy, Engaged Lifestyles

Once upon a time, before people knew any better, they thought that hearing loss was simply a part of growing older—something not worth doing much about. Not so. New research is forcing us to re-think how we look at hearing loss. **CONNECT WITH US FOR A FREE SEMINAR** and we’ll tell you about—the **good**, the **bad**, and the **avoidable**—connections between hearing loss and overall health.

The event is FREE, but seating is limited!

Roxann Bonta, M.A.,
President/CEO

Teresa Shipman, Au.D.,
Audiologist

The session will be led by **Roxann Bonta**, an Audiologist with 30 years of professional experience. Her presentation will use a blend of research, knowledge, wisdom and humor to bring you up-to-speed on the NEW research that shows hearing health is linked to more important health issues than we ever imagined.

Meet staff audiologist, **Dr. Teresa Shipman**, she is known for her mastery of hearing aid technology and for the concerned care she gives to her patients.
